### DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### *Election/Restrictions*

Applicant's election without traverse of Group I , species polysaccharide, carbon as carrier, & methoprene, in the reply filed on 1/18/06 is acknowledged.

Claims 21-41 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/18/06

.The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Claims 1, 5-20 stand rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Please address/amend to avoid confusion: the limits of pesticide concentration are 100%, yet there is a biopolymer & carrier present, with plaster of paris, so; what is the pesticide concentrations of 20-100%, 1-20 %, & < 1% , based on?

Claims 1, 5- 20 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Clarke 4876091 in view of Sjogren- 4732762 and MYLES-5676960.

The rejection of record is maintained;

Clarke teaches methoprene on carbon carrier (col 3, lines 8-17), in a wetted plaster of paris pH 7 pellet (col. 4, lines 5—28) at about 5% pesticide (col 6, top). The products can be adjusted to control release rate (col 4, bottom) over the life of the pellet (col. 5, lines 22-30), but a year is undisclosed, nor is a polymer mentioned. Clarke shows that the pellets can last substantially longer than the 150 day pellets of Sjogren 4732762 (col. 4, lines 40-57). MYLES provides polymers (col. 6, lines 43-53) with pesticides (col. 6, top-methoprene, col. 7, lines 50-60, col. 19, lines 14-30) with the polymers, and can incorporate carbon & plaster of paris (col. 7, lines 20-23). Additive components are shown by Myles- (col. 5, lines 42-49) if desired.

Applicant's arguments filed 1/18/06 have been fully considered but they are not persuasive. Applicant's arguments are directed to a failure to provide the instant stability demonstrated in the art of record. However, a composition is claimed, and we find other bases for providing that composition; improved control of release of the pesticide. Applicant's pointing to unobvious or superior results is beyond the scope of the invention as it is claimed., thus the rejection of the instant claims stands.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
